THE POPULATION OF SCOT-

LAND. The full Census for Scotland, though it adds, of course, largely to the information supplied by the interim Report of June last year, does not modify to any appreciable extent the estimate then made of the number of the population. The difference between the figures of the Returns sent in by the Registrars at that date and the carefully revised lists is only 103-a very minute diserepancy, which speaks well for thethoroughness shown in making the summaries. The exact total of the inhabitants in March, 1901, was 4,472,103, and is, for the first time since the people were accurately numbered, larger than the Irish. We find that the changes taking place in the distribution of the population of North Britain do not differ from . those of England. The tendency is to diminution in the pastoral and agricultural regions, and to increase in the manufacturing districts. For the purpose of classification, WESTLEY, Upper Richmond the 33 Scotch counties are marked off into eight divisions. In three of those there is a fall: Shetland, Orkney, Caithness, and Sutherland in the Hongkoug, October 15, 1902. 2113 Northern; Ross, Cromarty, and Inverness in the North-western; Roxburgh, Dumfries, Kirkendbright, and Wigtown in the Southern. The loss has been greatest in the North and South, where it is respectively 5.13 per cent. and 5.08 per cent. Agriculture and pastoral farming, which are the main industries of these parts, have not been sufficiently prosperous to retain the people on the soil. The farmers reduce the labour they employ as far as possible, while the attraction of work and DAHAR LODGE, THE PEAK. Vacant good wages draws the younger men and women to the manufacturing towns. Fifteen counties in all show a decrease. Against this is to be set off the remarkable growth in other divisions. In the South-Western-formed of Renfrew, Avr. and Lanark-it is no less than 19.17 per cent. On the whole, the advance has been very marked, and is at a higher rate than any known since the Census of 1881, when it was 13.04 per cent. This standard was not, indeed, HOUSES in CLIFTON GARDENS, reached in the ten years between 1891 and 1901, when the rate of increase was 11.00 per cent. If there is no change GODOWNS at Bownington (Praya in coming years Scotland will double its inhabitants by about the year 1967. Calculations which reach so far are liable to be falsified, and it is hardly probable that there will be nine million persons' North of the Tweed in this century. Even the United States, with the help of an enormous immigration, has not filled up to the extent estimated some forty years ago. The presence of an increased number of foreigners is to be taken as a tribute to the prosperity of CODOWN No. 1 (GROUND and TOP) Scotland, which was, at no remote FLOORS)-Storing capacity about period, very far from being in a position to attract strangers. The total number of foreigners in Scotland at the MOK MAN CHEUNG. Census was 22,627, of whom 14,448 BUTTERFIELD & SWIRE. were males, and 8179 females. Russian nationality stood pre-eminently to the fore, there being 10,373 Russians; Italians followed with a total of 4051, and Germans with a total of 3232. The numbers of foreigners had much AEIRION No. 2, the Peak, 6 Room increased since 1891, the total number House near the Flagstaff; from at that date being 8510 (males 5999, females 2011). The dry figures of a statistical compilation have solden been in more need of elucidation by comment than in this case. We should like to know, more fully than the Blue-book is able to tell us, why men and women of this nationality should be found in so large a proportion. The details given ON the UPPER LEVELS, an UNby the Census as to the extent to which Gaelic is spoken prove the tenncity with which a minority will adhere to their

MANY cough cures contain opium. The effect of this drug is to diminish secretion of the muchs, and the relief afforded is only temporary. As soon as the effect of the opium passes off, the malady returns in a more severe form. The system is also weakened and rendered more susceptible to cold. Chamberlain's Cough Remedy does not contain opium in any form. It affords relief and leaves the system in a healthy condition. It always cures and cures quickly. THE OSAKA EXHIBITION,

The Fifth National Industrial Exhibition opens at Osaka on the first of March and closes on the thirty-first of July in 1903.

It is situated at Imamiya, near the famous temple of Tonnoji, in the southern

district of the city of Osaka. The coming Exhibition, in its general plan and scope surpassing all the previous exhibitions held in the empire, will present a full illustration of Japanese art, produce and manufacture in their latest state of progress and development. Exhibits will be installed in the Agriculture Building. Manufacture Building, Machinery Building, Education Building, Transportation Building, Zoological Building, Foreign Exhibits Building, Fine Asta Building. hibits Building, Fine Arts Building and Aquarium by groups and classes after their classification. The Ceremonial Hall, Green House, Cold Storage, Tea House, Bazaars, Restaurants, &c., are to be built within the exhibition grounds. Osaka is the first commercial city of

Japan, and forms the centre of distribution of merchandise. It is the most progressive city, and its industrial development in the past few years has been great. Among its many attractions to visitors are the the Castle, now nearly ruined; the old Shinto temple of Tenjin, dedicated to the sacred moracry of Sugawara no Michizane, the great scholar and statesman; the old Buddhist temple of Tennoji, built by the Imperial Princo Shotoku Taishi over a thousand years ago; The Imperial Mint, organized in 1871 by The Imperial Government; the two temples of East and West Honganji, &c.

There are many interesting places within a short distance from Osaka. Nara, the ancient capital, with its old temples and its art treasures, is reached by rail in a few hours, and the famous Yoshino, where thousands of cherry trees bloom near the end of April, is within a few hours' journey. Kioto, the western capital of the empire, with its many attractions, is within one hour's railway journey from Osaka.

Sakai, where the Aquarium attached to the exhibition is situated in the Public Garden on the heach, is reached by rail in Garden on the beach, is reached by rail in an hour, and the old Shinto temple of Sumiyoshi, dedicated to the Gods of Sea.

is within a half hour's railway journey.

The fo eign visitors will find very comfortable accommodation in the new Osaka Club Hotel, situated on the charming island of Nakanoshima, right in the heart of Osaka.

Foreign visitors to Osaka during the Exhibition will obtain special privileges and free access to many places usually closed against all visitors, both Foreign and Japanese, ~ hesides the advantage of reduced rates on steamers and railways.

Madame Melha.

"Madamo Mo'ba," reports Mr George Musgrove, who has just returned to Australia, 'will give five concerts in Melbourne, five in Sydney, three each in Adelaide and Brisbane, and, if time can be found, four in New Zealand The latter, however, depends entirely upon the date of the departure of the San Francisco mail. Madame Melba is due in America for a grand opera season by a certain date, and it will be a squeeze to get the New Zealand tour in the programme. The Adelaide season will be during the week after the Melbourne Cup. Madame Melba will not sing during the racing carnival. She is not coming out for money, but primarily to see her old friends and relatives. Although I pointed out that all the country folks would be in Melbourne during the Cup week she finally declined to sing then. She was very emphatic on that point, and said to me, "No, I'm not going to sing in Melbourne during the Cup week, I will pay my company, but I'm going to sec the races with the boys and girls." 'I received,' said Mr Musgrove, 'numerous letter on the way out from various bodies requesting to be allowed to give Madame Melba a public welcome, but my instructions from her were that she is going to land in Australia as a private individual, She intends to spend some time with her family, and after the public have heard her sing she will accept other invitations. Madame Melba showed me a cheque for 1,000 singness the Rothschilds had given her for guing two songs. Madame Melba earns in England about £2,000 a week for the sesson but the calls upon her for charities, and the' assistance she gives to every Australian who appeals to her, reduce her income considerably. Miss Ada Crossley is a great success and earns more money than any other contraite in England.

The days of mythological beliefs have gone. This is an era of science-a matter-of-fact age. The darkness of ignorance and superstition is giving way to the penetrating light of modern science—the revelation of facts. Modern science has discovered that the best medicinal cod liver oil, in its analysis, may be separated into the other, a mass of certain semi-volid substances, known as extractives. The oil is not materially different from other fixed oils and has little or no medicinal value. On the other hand, the extractives are peculiarly active, and the conclusion cannot be avoided; that to the presence of these active principles cod liver oil owes it - reputation as a remedy. No other oil has such a reputation. No other oil his such constituents. The extractives hold the same relation to cod liver oil that quinine sustains to crude cinchona bark. They are the curative essence of cod liver oil. When taken as they may be freed from the vile, unnecessary oil, their curative value is greatly increased, for they are not lampered by the presence of the noxious fat. Upon this scientific fact.

Steams' Wine of Cod Liver Oil is based. It represents all the curative properties of the best cod liver oil in a vinous preparation. It also contains the best form of iron, making it also an ideal iron tonic. Wholesale from A. S. Watson & Co., Ltd., Hongkong.

LAUNCH OF THE TUGBOAT ROBERT COOKE.

At eight o'clock this morning the new tugboat Robert Cooks, built by the Hongkong and Whampos Dock Co., Ltd., for their ownuse, was launched from the stocks at Hunghom Docks. Although the hour was an early one, there was a good attendance of visitors to witness the christening beremony, which was gracefully performed by Mrs Goetz, wife of Mr E. Goetz, one of the Directors. The vessel glided off the ways without a hitch, and enthusiastic cheers were raised as Mrs Goetz broke the bottle of wine on the bows and again when

the tugboat was brought up in the water. The Robit Cooke is large, much broader and deeperthan the Dock Company's present tug Fame, and will have about double the power. She is a powerful sea-going tow boat, capable of towing ships to neighbouring posts, and will be able to handle with ease the largest vessels likely to enter this harbour. She is probably the most preverful tugboat of her class affoat.

The following are her dimensions : Length between perpendiculars. 150 ft Breadth, moulded, 27 ft., Depth, moulded, 14 ft. 6 in., Draft, mean, 10 ft. 9 in. Her engines are built to give her a speed of 12 knots per hour. The engines are inverted. vertical, triple expansion, surface condens-, ing; Diameter of cylinders, 13 in., 22 and 35 in.; Stroke, 30 in., Indicated horse power, about 1100. She is fitted with twin screws. There are two boilers. They are of the cylindrical, return-tubula type, and are constructed of mild steel The internal diameter is 13 ft. 3 inches. and length 10 ft. Mr Dixon gave the toast of 'Success to the Robert Books, and on behalf of the management of the Dock Company thanked Mrs Goetzin a few well chosen sentences for so kindly attending at that early hour to christen the vessel. He mentioned that the same had been chosen out of respect to the memory of the late Mr Cooke, who had served the Company so long and faithfully. MUNICIPAL REPRESENTATION. To the Editor of the 'CHINA MAIL.'

Hongkong, October 16. approve of my proposal for an Improve- creased three-fold. We, the Indians in not in agreement with me as to the desirability of a Municipal Council.

You state in your leader of Tuesday: The principal reason for the establishment of a Municipal Council is the assumption that the City of Victoria is badly governed.' Permit me to point out that no such argument was put forward by mo in my letter to the Press of the 10th inst. My contention was that the local government, which has never had a more arduous task before it than at the present moment, requires to be strengthened and encouraged in that task by the support of public opinion, expressed through a municipal body, containing an unofficial majority. I do not consider that the City of Vice toria is 'badly' governed, but I certainly

think that it might be better governed, public opinion on sanitary matters could be effectively brought to bear. You suggest in your leader that 'if there is any widespread desire to assist the Government, a Ratepayers' Association might be formed at which reforms could be advocated and discussed.' I regret that I cannot agree with you as to the utility of such a body, very cordially. because, inasmuch as it would possess no nowers whatsoever, such a body would amount simply to a debating society for the ventilation of private grievances, and could not, I submit, be seriously regarded as a satisfactory substitute for Municipal repre-

sentation. Your three main objections to a Municipal Council appear to arise from (1) Fear that the Council may be swamp-

ed by Chinese members (2) Fear that suitable European representatives cannot be found in the Colony

(3) Fear that the establishment of Municipal Council will involve the Colony in needless additional expenditure. As regards number 1 of the above three objections, I would suggest that no real difficulty arises. There are only two Chinese members on the Legislative Council, and : like number on the Sanitary Board, and -Chinese representatives on the suggested Municipal Council should not be restricted to two. You point out, and very justly, that Chinese ideas of sanitation are in conflict with ours, and accordingly no more representation of the Chinese upon a Munici-1 -equaint the Council with the bearing of any proposed measures upon Chinese habits

With regard to number 2 of your above three objections, you state; But even with restricted Chinese representation, the Council would trobably be a future because

personal interests are so involved here that few of the members would have a free hand, if drawn from the principal mercantile and shipping houses, while, if the of it being good policy to even give land significant busybodies, the value of the Council as an adjunct of the Government would be imperilled.' I must confess Port and administer to the general pros- that I am unable to share your views in this matter in view of the fact that men like Mr N. J. Ede, Dr Hartigan, Mr R. K. Leigh, Mr E. cation of offices, inasmuch as such Government officers as the Principal Civil Medical Officer, the Director of Public Works, and the Medical Officer of Health (or the proposed Sanitary Commissioner) must, of necessity, have seats in the Municipal

As regards the above point (a) and vari ous other matters which are dealt with in your leader. I think that it will be convenient, in view of the length of this letter, to deal with them in a subsequent communication.- I am, Dear Sir, yours faith-
